PROFILE

I'm a Full-Stack Developer with 2 years of experience building user-friendly and reliable applications. I work with front-end tools like HTML, CSS, JavaScript, React, and React Native, and back-end technologies like Node.js and Express.

I'm experienced in working with databases like MongoDB, Firebase and MySQL, and I'm skilled in using Git, Azure, and API development. I love to up-to-date with new industry trends. I'm looking for a role where I can grow, solve challenges, and contribute to exciting projects.

WORK EXPERIENCE

Associate Software Engineer
Feb 2023 - Present (1 year (months))

SYNAPSYS LTD - Full-time

Front-End Developer (React.js, React Native)

- Developed and maintained dynamic, high-performing web applications using React.js and cross-platform mobile applications with React Native.
- Optimized applications for performance and user experience, and fixing bugs.
- Integrated external APIs (JSON) to seamlessly retrieve, manage, and display data within React.js applications, ensuring smooth user experiences.
- Utilized Redux Toolkit for efficient state management and implemented Ant Design (antd) UI components to create responsive, user-friendly interfaces.
- Followed Git best practices for version control, including structured branching and collaboration workflows, to ensure smooth team coordination and reliable project delivery.

Software Engineer Intern
May 2022 - Dec 2022

Bittbash (PVT) Limitted

- Developed and maintained a web application using React.js, focusing on delivering a responsive and dynamic user experience.
- Integrated and connected external APIs (JSON) to retrieve and display data efficiently within the React.js application.
- Worked with Node.js and Express.js for back-end development and utilized Axios for seamless API connectivity and data handling.
- Followed Git best practices for version control, including structured branching and collaboration, ensuring smooth project management within the development team.

Tandin Wangchen
Senior Software Engineer,
Synapsys LTD
tandinwangchen27@gmail.com

SKILLS

- Front-End Technologies : React Native, React.js, HTML, CSS, Tailwind css, JavaScript, TypeScript, Ant Design(antd), Redux toolkit
- Back-End Technologies: Node.js, Express.js, MongoDB, Firebase, MySQL, REST APIs, Axios
- Other Technologies: Git, Azure Cloud
- Soft Skills: Adaptability, Problem-solving, Team collaboration, Attention to details

PROJECTS

Medics App

We developed Medics app for Medics Academy, designed to provide a comprehensive platform for students to enhance their learning experience within the Academy.

Key Contributions:

- Developed the mobile app using react native CLI, ensuring smooth and responsive user experience across both iOS, and Android platform.
- Implemented UIs, following clean code principles, focusing on performance and scalability.
- Contributed to backend development, assisting with building RESTful APIs using Node.js and Express.js and integrating Firebase for real-time data storage and retrieval.
- Fixed critical bugs and worked on performance improvements to ensure application stability and seamless user experience.
- Collaborated with tech leads and team members to align development work with client requirements, attending client meetings.
- Maintained version control using Git, following best practices for branching, and structured deployment processes.

Technologies used: React Native, CLI, Firebase, Node.js, Express, REST APIs, Git

Octoplex - Boardroom and Meeting Management System

Octoplex is a solution to streamline boardroom and meeting management within corporate environments. It helps to Meeting scheduling (physical, google meeting, zoom and hybrid), Managing Documents, Employees and Workflow circulations to ensure smooth process flow within team.

Key Contributions:

- Deliver a user-friendly product, improving user satisfaction and meeting client goals by developing meeting scheduling with entire calendar management.
- Contribute to other functionality's success by collaborate effectively with team members.
- Analyze and enhanced user requirements to proactively align features with customer expectations with project manager and business analyst.
- Use Best practices for develop clean code by using reusable components, use redux to handle state management, maintain comments within codes.
- Handled API integrations using Axios.

Technologies: React, Ant Design (antd), CSS, Redux Toolkit, Axios, Azure
